

The Brighttree® ePurchasing Program with McKesson DirectSM

Integrated ePurchasing Streamlines
Processes and Lowers Costs

With Brighttree Integrated ePurchasing, you can view the McKesson item availability in real time, perform one-touch drop shipments and receive automatic confirmations, including delivery notifications.

Improve Purchasing Process & Operations

- Quickly place accurate orders
- Decrease shipping and delivery expenses
- Optimize inventory: reduce carrying costs
- Avoid overstocks and product shortages
- Eliminate re-keying and data entry errors
- Reduce administrative tasks for printing, faxing, and follow up
- Real-time item availability and pricing

Fully integrate your ePurchasing with McKesson Direct. See the catalogs, get real-time prices, easily place orders, & receive confirmations.

Improve workflows, reduce costs and increase revenue. Brighttree Integrated ePurchasing delivers efficiencies to providers like you that help relieve the mounting industry pressures of reduced reimbursement rates, additional compliance regulations and higher shipping charges.

The new Brighttree ePurchasing Program with McKesson Direct delivers innovative capabilities via Brighttree's web-based HME business management solution to help you dramatically improve efficiencies. Through Integrated ePurchasing, you can reduce errors, save time and improve profitability.

- Patient Contact Management

Services

- Full-service Outsourced Billing
- Optimization Consulting
- Compliance Monitoring
- Remote and On-Site Training
- Business Consulting

Our Integrated ePurchasing solution, enabled through Brightree's electronic trading agreement with McKesson, allows you to see updated prices, place orders, and receive confirmations directly from the Brightree platform. You can access the McKesson online catalog in real-time, so that you have the most current product information available.

Simplified Purchasing with a High-Impact ROI

Even for customers already doing online ordering, Brightree ePurchasing eliminates the need to key an order twice into both the Brightree and McKesson systems. All acknowledgements, tracking notices, invoices and delivery confirmations are electronic, which reduces faxing, printing and other administrative tasks. Also, providers who combine Integrated ePurchasing with drop ship ordering can significantly decrease delivery costs. Especially for maintenance supplies, drop shipping creates a "virtual inventory" –reducing inventory processing and carrying costs.

Automation Saves Time, Helps You Earn More Cash

Integrated ePurchasing in Brightree automates mission-critical tasks to reduce or eliminate:

- Duplicate order entry
- Double shipments to the warehouse and then to the patient
- Processing shipments in and out of inventory
- Printing (purchase orders, confirmations, invoices)
- Faxing and phone calls

Brightree is a comprehensive billing and business management software platform. The Brightree ePurchasing solution is completely integrated with the core Brightree system and is an extended service of Brightree Inventory Management.

Brightree is the number one provider of billing and business management software to HMEs. Brightree is investing \$70 million in the next four years to add significant software functionality and lead the industry in enabling providers to succeed in a competitive environment, as well as take on the challenges of regulatory change.
